Quarto

Quarto Tables T1

Table 1: A simple fruit inventory table

Product	Quantity	Price
Apple	5	$1.20
Banana	12	$0.50
Cherry	100	$0.05

Quarto T2

See Table 1 for inventory levels.

fruit	price
apple	2.05
pear	1.37
orange	3.09

Typst

Table 2: This is the caption for the native Typst table.

Item	Quantity	Status
Premium Widgets	250	In Stock
Super Gadgets	12	Low Stock
Mystery Boxes	0	Out of Stock

As shown in Table 2, stock levels vary.

R

GT Table - R

Table 3: Table generated via gt package

Fruit	Price
Apple	2.05
Pear	1.37

gt (Great Tables): Highly recommended. Posit heavily optimized gt so that its CSS-based styles, complex multi-tier headers, and footers automatically translate into native Typst code with zero layout degradation

RTable - kable

```
library(kableExtra)
kable(head(cars))
```

Table 4: Cars

speed	dist
4	2
4	10
7	4
7	22
8	16
9	10

Python

Table 5: Table generated via Pandas

```
   Fruit  Price
0  Apple   2.05
1   Pear   1.37
```

Python Tables T2

Table 6: Astronomical object

Native Quarto. List Table

Header 1	Header 2
This cell contains a long paragraph.	This cell contains a bulleted list: • Item A • Item B

Sub Tables - Quarto

Table 7: Main Caption

(a) First Table

Col1	Col2	Col3
A	B	C
E	F	G
A	G	G

(b) Second Table

Col1	Col2	Col3
A	B	C
E	F	G
A	G	G

See Table 7 for details, especially Table 7b.

typstable in R

A specialized CRAN package built exclusively to output Typst markup. It features a pipe-friendly (|>) syntax specifically built for grouped headers, row groups, and conditional cell formatting compiled directly for Typst engines.

Table 8: Advanced dataset formatting compiled cleanly with typstable.

			Performance Metrics		**Financials**
Ser	Model	Category	Speed (GHz)	Efficiency (%)	Cost (Rs)
1	Alpha	Core	95	91	120
2	Beta	Core	88	84	110
3	Gamma	Edge	72	95	85
4	Delta	Edge	64	78	75

Refer to Table 8 to see how the row blocks and grouped metrics line up natively.

tinytable in R

https://vincentarelbundock.github.io/tinytable/vignettes/tinytable_tutorial_typst.pdf

• An excellent, lightweight alternative that features dedicated Typst engine support without drawing heavy dependencies. The tinytable package is a newer, ultra-lightweight, and zero-dependency alternative to gt or kableExtra that works exceptionally well with Quarto and Typst. It has a clean, explicit syntax (style_tt(), format_tt(), group_tt()) and outputs clean native

Table 9: An example table built using the tinytable engine.

Table 15: Background Color and Font Style in TinyTable3

In tinytable, the background argument sets the cell fill colour, while color sets the text colour. For your Quarto–Typst reports, it is recommended to use a dark header, light blue group headings, and a white or light-grey table body.

Long Tables (Spanning Pages)

By default, Typst wraps tables inside non-breakable figures, which prevents them from splitting across multiple pages. If you have a long table, add this show rule somewhere in your document to allow them to break gracefully across pages

or

Table 18: The full Iris dataset displayed across multiple pages with repeating headers.

Iris Dataset Measurements

All 150 observations

Sepal.Length	Sepal.Width	Petal.Length	Petal.Width	Species
5.1	3.5	1.4	0.2	setosa
4.9	3.0	1.4	0.2	setosa

5.1	3.4	1.5	0.2	setosa

As we can see in Table 18, the data spreads over several pages cleanly.

1. #show figure: set block(breakable: true): This is the native Typst rule that permits the table container to split across pages.
2. Native gt Translation: When format: typst is active, gt compiles the data into a native Typst #table(). Native Typst tables duplicate their table.header() onto every new page by default without needing extra R code configurations.

Modify Table Options using gt

https://gt.rstudio.com/reference/tab_options.html
